Technologies

VueJS, Vue Router, JavaScript, TypeScript, Node, npm, CSS, SCSS, SASS, HTML, Chrome, Firefox, Edge, Vuex, Pinia, Vite, Vuetify, ESLint, Prettier, Vitest, Jest, Cypress, Playwright, AWS, Azure, Google Cloud, Cloud Lambdas, NativeScript Vue, Ionic, Native iOS Development, Native Android Development, Continuous Integration, Continuous Deployment, Web Hosting, Vercel, Supabase, Firebase, FeathersJS, GraphQL, Kubernetes, NGINX, MySQL, PostgreSQL, Postgraphile, Git, GitHub, GitLab, Atlassian JIRA, Figma, Notion, Slack, LogRocket, RocketChat, Skype, Zoom, Google Hangouts, Discord, Trello, Wekan, Visual Studio Code, Sublime Text, Notepad++, Code::Blocks, C++, C, C#, Emscripten, SonarLint, SonarQube, Codacy, codecov.io, LLVM / Clang, MSVC, GCC, Intel V-Tune, Valgrind, GDB, LLDB, LLD, Java, Ruby, Python, Lua, Go, Rust, Bash, Batch, PowerShell, Windows, Linux, MacOS, OpenAI, Neural Networks, Machine Learning, TabNine, Docker, Docker Compose, Arduino, Raspberry Pi, Self-Hosting, Arch Linux, Hyprland, Paru, Pacman, BTOP, GDM, LightDM, LXDM, SDDM, Ubuntu Desktop / Server, Custom PC Building, Graphics Drivers, Pathfinding Algorithms, Virtual Machines, SSH, SSL, TCP / UDP, Blender, Websockets, uWebSockets, LZ4, cURL, minizip, tar, Boost, Flecs, EnTT, spdlog, GLFW, Box2D, Chipmunk2D, OpenGL, DirectX, Vulkan, Metal, Shaders (GLSL, HLSL), Aseprite, Hexels, Photoshop, Unreal Engine, Godot, Yubikey

I am a full stack software engineer with a passion for building websites, applications, and games. I work with a wide range of technologies and enjoy learning new things. I strive to write well-tested clean code that is easy to extend and maintain. I am most experienced with VueJS frontend development, followed by C++.

Technical Expertise

Web Design

- Full Stack Web Development
- Professional VueJS, > 5 Years Experience (Vue 2, Vue 3)
- Integration with Backend APIs
- HTML, CSS, and JavaScript

TypeScript, NodeJS

- Visual Studio Code Extension Development
- Backend Development / Business Logic

C++

- Primarily C++20
- CMake, Ninja
- Pointers, Move Semantics, Concepts, Operators, Lambdas
- Templates, CRTP, 'if constexpr', Inheritance, RAII
- Multi-Threading, Lock-Free Data Structures, Thread Pools
- Boost (Asio / Beast with Websockets, Interprocess, Graph, ...)
- Utilizing C APIs and Libraries
- Standard Template Library
- Game Engine Development, ECS Design Pattern
- Books: Scott Meyers, Concurrency In Action, Templates, Clean Code

General

- I work from Arch Linux, using virtual machines where necessary. I maintain a small fork of the OS.
- Lua, Java, Bash Scripting
- Continuous Integration and Deployment
- Server Management, SSH
- Physical 2FA
- Data Processing, Neural Networks
- Compression, Encryption
- Pathfinding (A*, Dijkstra, Quad Trees)

Work Experience

Full Stack Software Engineer, Remote

Stagency, Los Angeles, CA
2019 to 2020

- Orchestrated the planning and creation of dozens of UI features using VueJS.
- Helped build GraphQL API to support product frontend.
- Lead development of mobile client using NativeScript Vue.
- Continuously provided code review to other team members.
- Collected and acted upon user feedback.
- Trained ML model to support product frontend.
- Pitched product to potential customers.
- Performed emergency DevOps recovery.
- Communicated directly with CTO and CEO.
- Actively removed legacy code and tech debt from codebase.
- Utilized agile development methodology to improve productivity.
- Enjoyed learning a lot!
- Gained experience with PostgreSQL, VueJS, NodeJS, Postgraphile, GraphQL, Google Cloud, Apollo, K8s, Docker, CI/CD Processes, NativeScript + NativeScript Vue, Pull Requests, Atlassian JIRA, and Slack.

Junior Software Engineer, Remote

Sutoiku, Los Angeles, CA
2019 to 2021

- Responsible for frontend creation, testing, and integration using VueJS.
- Took the lead on several projects.
- Learned to build and maintain 100% test coverage.
- Built and maintained unit / integration test suites.
- Integrated product web frontend with Node and C++ backends.
- Participated in weekly and daily meetings.
- Travelled internationally to meet with the team.
- Worked within bi-weekly agile sprints.
- Communicated directly with CEO, CFO, CPO.

Freelance Software Engineer, Remote

2019 to Current

- Developed unique software solutions for various clients.

Education

Associate of General Studies, Business

Colorado Early Colleges, Fort Collins, CO
2020 Graduate

Hobbies

- Game Development
- Pixel Art & Color Theory
- Skiing and Snowboarding
- Running and Exercise
- Music
- Film / TV
- Toastmasters / Speech Giving
- Improv
- Biohacking / Health Optimization
- Raspberry Pi Computing
- 3D Printing
- Project Euler / Programming Challenges
- Embedded Systems Development
- Climbing
